

What components are in the kit?

- Product Name: Plant Watering Kit with Arduino UNO R4 WiFi
- SKU: KZ-0069

Plant Watering Kit with Arduino UNO R4 WiFi Manual

Introduction

Welcome to the Arduino UNO R4 WiFi Shield Kit! This kit is designed to provide a comprehensive solution for environmental monitoring and control with the integration of soil moisture sensors, NTC temperature sensors, relay modules, and water pumps, all managed through a 1.3-inch IPS RGB TFT screen. This manual will guide you through the setup process, from preparing the Arduino IDE to configuring the hardware and software components.

Compatibility

Arduino Product Name	Compatibility	TFT Screen Support	WiFi Support
Arduino UNO R4 WiFi	YES	YES	YES

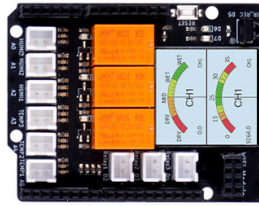

Arduino Product Name	Compatibility	TFT Screen Support	WiFi Support
Arduino UNO R4 Minima	YES	YES	Need ESP01S module
Arduino UNO R3	YES	NO	Need ESP01S module
Arduino Leonardo	YES	YES	Need ESP01S module
Arduino Due	YES	YES	Need ESP01S module
Arduino YUN	YES	YES	YES
Arduino Mega 2560	YES	NO	Need ESP01S module
Arduino UNO	YES	NO	Need ESP01S module
Arduino NANO	NO	NO	NO
Arduino MINI Pro	NO	NO	NO
Arduino UNO Mini Limited Edition	YES	NO	YES
Arduino Zero	YES	YES	YES
Arduino UNO WiFi Rev2	YES	YES	YES

Package Includes

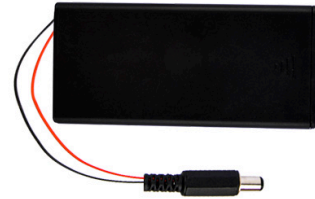

PACKAGE INCLUDES

Arduino UNO R4 WIFI *1

Plant Watering Control Module*1

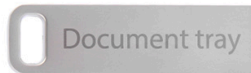

18650 Battery Storage Case *1

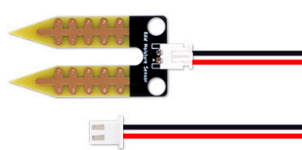

No 18650 battery

NTC Temperature Sensor *3

USB Flash Drive *1

Soil Moisture Sensor Module*3

Rubber gasket for water pump fixation*6

Water pump*3

Acrylic bracket*1

Transparent Drip Emitters *3

Infrared remote control*1

USB-C Programming Cable*1

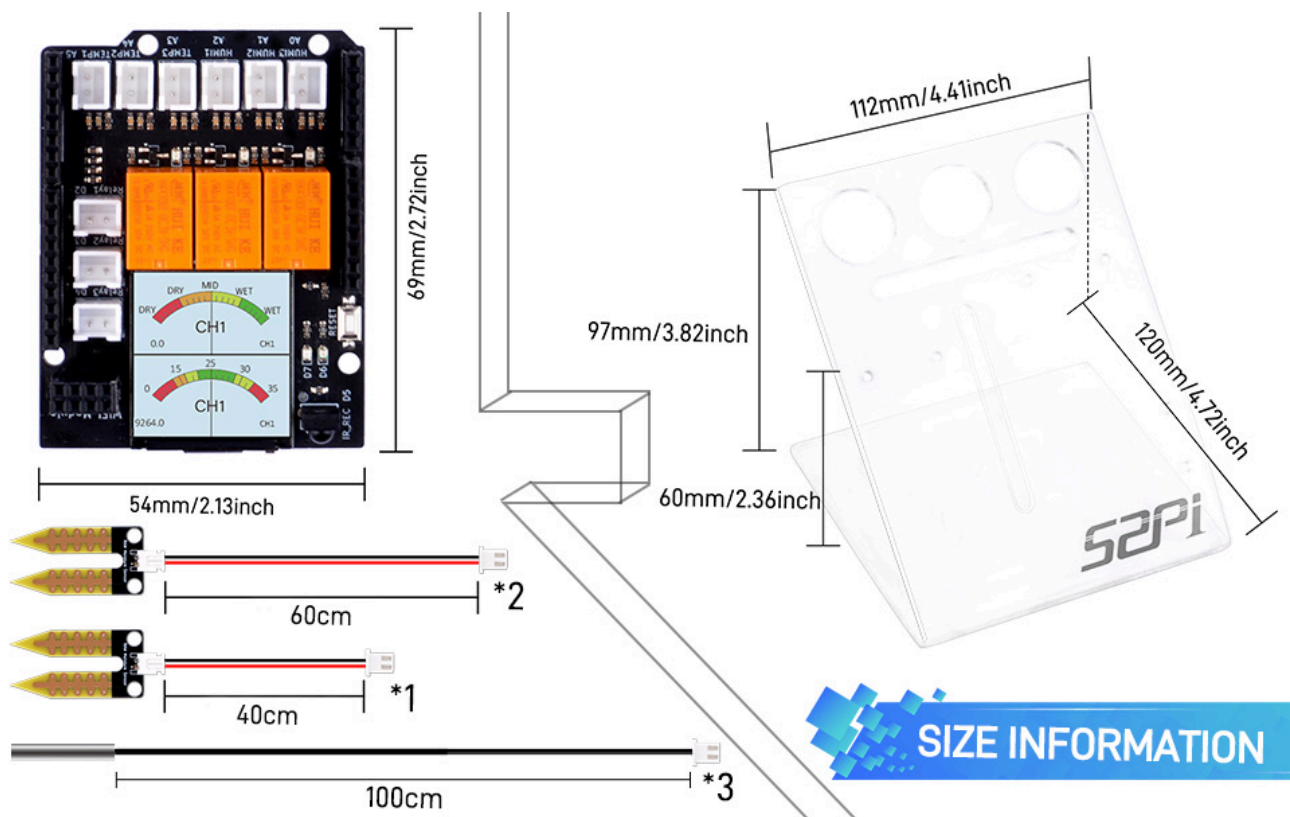

Cable Ties*2

Transparent water pipe 5m*1

Dimension
